

Check List of Macedonian Spiders (Araneae)

Gergin A. Blagoev

Abstract: The present check list is based on the incorporation of all available published records of spiders within the limits of the existing borders of the Republic of Macedonia. A total of 558 spider taxa from 36 families are listed. Altogether 3 712 records based on 32 publications on Macedonian spiders are verified. Some changes in species nomenclature are given.

Key words: check list, spiders, Araneae, Macedonia.

Introduction

The arachnological studies of Macedonia started in the beginning of the 20th century. The first data concerning spiders can be found in the work of Stojčević (1907). The majority of spiders assembled in Macedonia was published by Stojčević (1929) and Drensky (1924, 1929, 1935, 1936). In his '*Katalog der echten Spinnen (Araneae) der Balkanhalbinsel*' Drensky (1936) has reported 419 spider species from 1 345 records found on the territory of the Republic of Macedonia.

Many recent authors in their papers add contribution to the arachnological research in Macedonia (Blagoev, 1999; Bosmans, 1997; Deltshev, 1997; Deeleman-Reinhold, 1978, 1985; Deeleman-Reinhold, Deeleman, 1988; Grimm, 1985; Lugetti, Tongiorgi, 1969; Nikolić, Polenec, 1981; Tongiorgi, 1966; Wunderlich, 1973, 1979, 1980, 1985) (Table 1).

Taxonomy

Species in synonymy:

Commaroma ressenensis Drensky, 1929: 36 = *Spermophora senoculata* (Dugès, 1836)
- (Deltshev, Blagoev, 2001: 111)

Echemus babunaensis Drensky, 1929: 5 = *Zelotes babunaensis* (Drensky, 1929)
- (Deltshev, Blagoev, 2001: 111)

Hogna (Tarentula) macedonica Drensky, 1929: 52 = *Hogna radiata* (Latreille, 1817)
- (Deltshev, Blagoev, 2001: 111)

Micaria turcica Drensky, 1915: 159, 176 = *Micaria albovittata* (Lucas, 1846)
- (Mikhailov, 1991: 78).

Prosthesima bitolensis Drensky, 1929: 7 = *Zelotes gracilis* (Canestrini, 1868)
- (Deltshev, Blagoev, 2001: 111)

Tarentula konstantinovi Drensky, 1929: 53 = *Alopecosa sulzeri* (Pavesi, 1873)
- (Lugetti, Tongiorgi, 1969: 67)

Species as nomina dubia:

Theridium undulatum Westring, 1861 - (Holm, 1973: 76)
Drensky, 1936; Nikolić, Polenec, 1981.

Porrhomma fons-frigidus Drensky, 1929 - (Thaler, 1968: 384)
Drensky, 1929, 1935, 1936; Kratochvíl, 1936; Miller, Kratochvíl, 1940; Nikolić, Polenec, 1981.

Списък на паяците (Araneae) в Р. Македония

Гергин А. Благоев

(Резюме)

Настоящият списък е създаден на базата на цялата съществуваща литература за паяците в днешните граници на Р. Македония. Списъкът съдържа актуализирана информация за 558 таксона паяци от 36 семейства. Общо 3 712 записа са основани на 32 литературни източника върху македонската арахнофауна. Събрани са всички съвременни номенклатурни промени на паяците в Македония.
